

**Grazing Management (CSP Enhancements)
 Colorado Enhancement Activity Job Sheet G-7**

February 2005

Name:

Rotation of Winter Feeding Areas

Payment = \$1.50 / Acre / Year for fields where winter feeding areas are rotated more than once during the winter. Winter feeding areas will be rotated in coordination with or as a part of a grazing management plan or, at a minimum, when there is a 50% loss of vegetation from the feeding area.

Utilize the rotation of winter feeding areas to maintain vegetation of impacted areas. This tool is also being used to manage access to riparian areas and forage utilization to maximize production potential with minimal financial inputs.

Documentation Required: Use the following table for documentation and attach a plan map showing the location of management units involved in the decision support tool use. An example is provided to assist you.

Management Unit(s)	Reason for Move	Field Acres	Date Moved
Field 9 <i>Example</i>	Forage deterioration at 50%	2.5	12/15/03

Utilization of Rotated Winter Feeding Areas to Protect Resources Certification

I certify that I rotated winter feeding areas as shown in the table above, meeting the requirements of the enhancement.
